( experience of working on live projects.)

**PROJECT:** Ad Analysis, exploratory data analysis on data sets.

#### DECLARATION:

I, hereby declare that all the information provided above is true to the best of my Knowledge and belief.

Respected Sir/Ma'am,

I am submitting my resume for consideration for the full-time job in your Company. Given the skills and experience outlined in my enclosed resume, I believe I will be a worthy asset to your team.

In my five years at Modern College and Shri Shankaracharya Technical Campus, I completed BCA, MCA and undertook a significant amount of coursework on cutting-edge programming skills and best practices. During that time, I focused on Principles of User Experience, where I learned and applied skills such as user journey mapping.

I have 10 months experience of internship in Globussoft Company, I have learnt and explored various important libraries and tools in the field of data analysis, machine learning, web scraping, and natural language processing. I gained proficiency in numpy, pandas, and matplotlib, which are essential for data manipulation, analysis, and visualization. Additionally, I acquired skills in seaborn for advanced data visualization and sklearn for machine learning tasks.

I also worked with opencv for image processing, nltk and textblob for natural language processing tasks, and requests for making HTTP requests. Furthermore, I learned web scraping using selenium and beautifulsoup. Lastly, I implemented logging to ensure efficient debugging and error handling in my projects. This internship provided me with valuable hands-on experience with these powerful tools and libraries.

I believe I would make an excellent addition to your team.

I look forward to hearing from you!

Sincerely,  
Yogesh Kumar Sharma
